

## Capstone Alternative Independent Research Proposal

Name: \_\_\_\_\_ Semester to be completed: \_\_\_\_\_

Projects can take the form of any independent research venture that results in a tangible display of knowledge. You could undertake an independent study with a faculty member, complete an additional research paper in a regular class, put together a study abroad journal or presentation, compose a play, musical score, or other creative manuscript, or design any other suitable academic/creative exercise for which you are not receiving normal class credit. In the space below, describe the research project that you propose to undertake, including your subject matter, research methodology (if applicable), professor you'll be working with, and what the finished product will be.
